

# Magic Squares

**Muhammad ibn Muhammad al-Fullani al-Kishnawi**  
**Astronomer, mathematician**  
**Northern Nigeria, 1732**

2		
		1
4	3	

Place 1,2,3,4,5,6,7,8,9 so that the rows, columns and diagonals all have the same sum.

Muhammad ibn Muhammad al-Fullani al-Kishnawi (1732)

**5 by 5 Magic Square:  
Use each of  
1,2,3,4,5,6,7,8  
once, so rows,  
columns and  
diagonals  
have the  
same sum.**

		21	20	19
25	10	15	14	
22	17	13	9	
	12	11	16	18
	24			23

1 2 3 4 5 6 7 8

What should the sum of each row be?

$1+2+3+4+5+6+7+8+9 =$  the sum of three rows

$(1+2+3+4+5+6+7+8+9)/3 =$  sum of one row

What is  $1+2+3+4+5+6+7+8+9$ ?

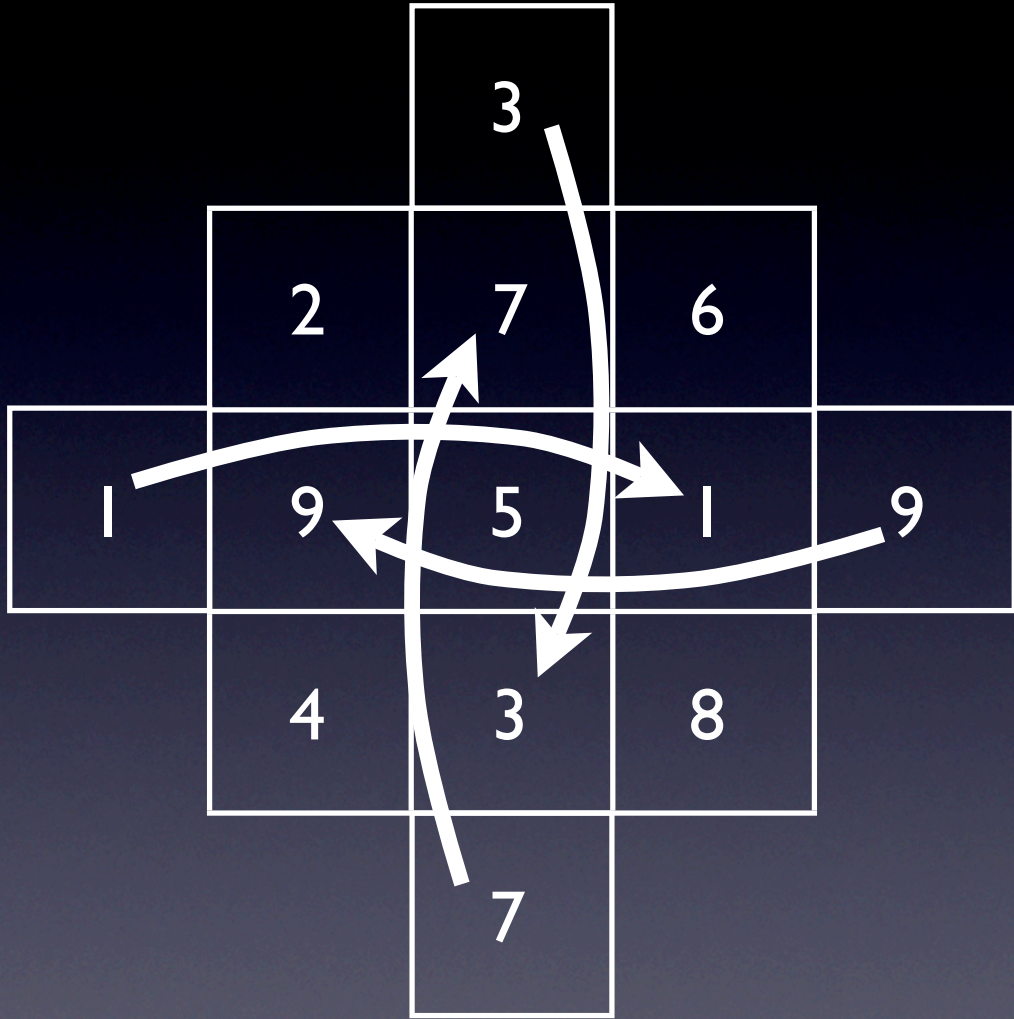

$1+2+3+4+5+6+7+8+9 =$  Sum of all numbers

$9+8+7+6+5+4+3+2+1 =$  Sum of all numbers

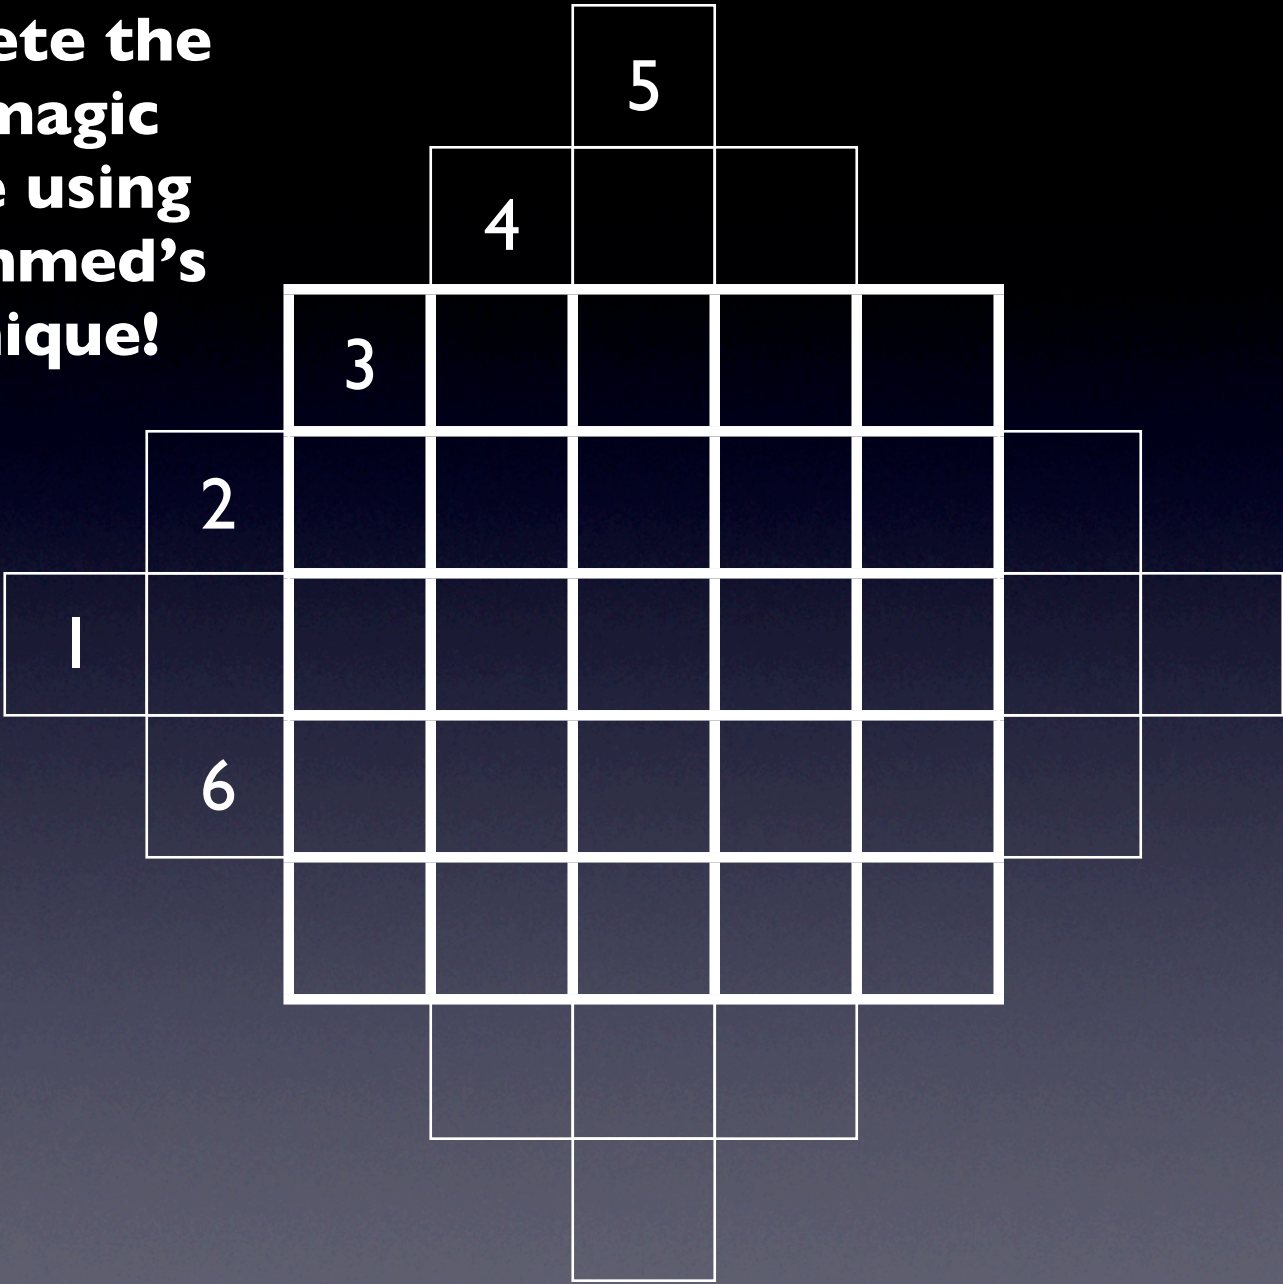

$9(10) = 90 = 2(\text{Sum of all numbers})$

$90/2 = 45 =$  Sum of all numbers

Row sum  $= 45/3 = 15$

**Complete the  
5X5 magic  
square using  
Muhammed's  
technique!**

5X5 row sum = ?

What is  $1+2+3+\dots+25$ ?

$$1 + 2 + 3 + \dots + 25 = \text{Sum}$$

$$\underline{25 + \dots + 3 + 2 + 1 = \text{Sum}}$$

$$25(26) = 650 = 2(\text{Sum})$$

$$650/2 = 325 = \text{Sum of all numbers}$$

$$1+2+3+\dots+25 = \text{the sum of 5 rows}$$

$$(1+2+3+\dots+25)/5 = 325/5 = 65 = \text{row sum}$$
