## Math 1B

## **Post Midterm 3 Review and Final Exam Comments**

Use the study guides from midterms 1, 2 and 3 to review chapters 3.11, 5, 6, 7 (except 7.7) and 8.1, 8.3, 8.5.

The following questions act as a review for the 7.7 and chapter 9 material which will be included.

Estimate  $\int_{0}^{9} f(x) dx$  using n = 4 and each of the methods below. [1]

x	0	1	2	3	4	5	6	7	8	9	10
f(x)	7	9	10	13	12	10	7	3	2	2	5

- Midpoint Rule [a]
- [b] Trapezoidal Rule
- [c] Simpson's Rule

## DELETED [2]

[3] Solve the following initial value problems.

[a] 
$$\frac{dy}{dx} = \frac{2y}{x^3}$$
,  $y(1) = 1$  [b]  $\frac{dy}{dx} = \frac{1+y^2}{\cos^2 x}$ ,  $y(0) = 1$  [c]  $\frac{dy}{dx} = e^{2x+y}$ ,  $y(0) = 1$  [d]  $\frac{dy}{dx} = \frac{1}{x^2y}$ ,  $y(1) = 4$ 

[c] 
$$\frac{dy}{dx} = e^{2x+y}$$
,  $y(0) = 1$  [d]  $\frac{dy}{dx} = \frac{1}{x^2 y}$ ,  $y(1) = 4$ 

Use Euler's method to approximate the value of y(2) for each initial value problem using the specified value of h. [4]

[a] 
$$\frac{dy}{dx} = x + y^2$$
,  $y(1) = 1$ ,  $h = 0.5$  WITHOUT USING A CALCULATOR

[a] 
$$\frac{dy}{dx} = x + y^2$$
,  $y(1) = 1$ ,  $h = 0.5$   
[b]  $\frac{dy}{dx} = \cos x + \sin y$ ,  $y(0) = 0$ ,  $h = 0.2$   
[c]  $\frac{dy}{dx} = x^2 - 2y^2$ ,  $y(0) = 0$ ,  $h = 0.1$ 

[c] 
$$\frac{dy}{dx} = x^2 - 2y^2$$
,  $y(0) = 0$ ,  $h = 0$ .

The final exam will be approximately 50% multiple choice, with no partial credit for those problems (since you won't have to show work). There will be a no-calculator section and a calculator-allowed section.

The questions on volume and work will all be on the multiple choice calculator-allowed section. You will be expected to simply set up the integrals, then use fnInt to find the correct answer. That means you must be able to set up the integrals correctly, and you must be able to use your calculator correctly.

[2] DELETED

[a] [3]

[b]  $y = \tan\left(\frac{\pi}{4} + \tan x\right)$ [d]  $y = \sqrt{18 - \frac{2}{x}}$ 

 $y = 1 + \ln 2 - \ln(2 + e - e^{2x+1})$ [c]

4.75 [4] [a]

[b] 2.3783

1.2565 [c]
